

Galaxy 23

Information from the United States Power Squadrons District 23 Bridge

D/Lt/C William Fehr, N
District Executive Officer
October 2013

Greetings! I hope to see you all very soon at the District 23 Fall Conference in Cocoa Beach. My report will be short and sweet. As of this writing I have not received any information about what went on at the governing board meeting in San Antonio, but I am sure D/C Tim Henke will fill us in at the conference.

I have asked some of the committee chairs in the District Executive Department to give a short report on what's been going on. So far this year we have completed 507 VSE's with 384 receiving a decal. The lead Squadron is Cocoa Beach with 103. Our D/PRO has been reporting about the MOU between Tall Ships America and the United States Power Squadron. The official signing will be at the annual meeting February 1st 2014 in Jacksonville. Also in the PRO department, Cdr David Haslam has been working on a DVD and will have a report at the conference. Co-op charting has been rather slow this year; Banana River SPS submitted three reports, which have been accepted by NOAA.

I know we are only half way through this term of the present Bridge and it may sound early but I understand that the district nominating committee is busy working on the next year's District leadership. If you would like to help out at the district level please let one of the District nominating committee know. There are many committees outside the Bridge that could use your help.
