

The Mariner's Compass

Seminar overview: The mariner's compass is still the boater's primary navigation tool and an essential tool when all others fail!

Topics covered: Here you will learn how to select, calibrate, install and use your compass on board your boat. You will learn which features are most important and which will work best for you on your boat. Learn to calculate variation between magnetic and true north, and how to adjust your compass to compensate for onboard magnetic influences which produce deviation.
