

Education

Education is an essential aspect of the United States Power Squadron organization. Both self-education within the membership, and public education are stressed.

America's Boating Course is taught to the boating public and successful completion of the course qualifies a boater to apply for a Connecticut Boating Certificate.

Beyond the basic course, there are a whole series of courses to hone your boating skills. For the member, completion of some of the advanced courses qualify you for lower insurance rates if you hold USPS insurance on your boat. For everyone, member or not, the courses are an eye-opening experience. Regardless of your past boating experience, you WILL learn something new each and every time you take one of these courses.

Course Information
