Notes on cell phone apps

[Marine Traffic](#) AIS live

Map display of the location of boats that have AIS. (Want to see that boat stuck in the Suez Canal?)

[Boat Beacon](#) Google Play

Map display of the location of boats that have AIS. You do not need an MMSI to use Boat Beacon and you can be seen on Boat Beacon by other Boat Beacon users without having one. NOTE – also works on land to keep track of another car/driver during trips.

[Navionics](#) (Not free) \$21.99

Detailed Nautical Charts Wherever You Will Go

The Boating App provides nautical charts for cruising, fishing, sailing, diving and all the other activities on the water. The same detailed marine and lake charts and advanced features as on the best GPS plotters.

[Wunderground](#)

The world's most accurate weather service, pinpointed to any microclimate.

Check current conditions or forecasts with data points from 250,000+ personal weather stations across the globe.

Interactive map with radar, high-resolution satellite imagery, severe weather alerts, and more.

Customized experience with light and dark modes and map styles.

[MyRadar](#) Weather radar

MyRadar is a fast, easy-to-use, yet powerful weather app that displays animated weather radar around your current location, allowing you to quickly see what weather is coming your way. Just start the app, and your location pops up with animated live radar, with radar loop lengths of up to two hours. This basic functionality provides the quickest way to get a fast snapshot of the weather on-the-go, and it's what has made MyRadar so successful over the years. Check your phone and get an instant assessment of the weather that will impact your day.

[CompassPro](#) \$1.49

Main advantages of our Compass app:

- Shows device real-time orientation to North - Ability to switch between Geographic Pole and Magnetic Pole
- Beautiful and modern material design style - Use of GPS or Network location for best accuracy
- Show Location coordinates (longitude, latitude). - Show location address - Magnetic fields signal indicator

[GPS Essentials](#)

The most complete GPS tool available: Navigate, manage waypoints, tracks, routes, build your own dashboard from 45 widgets. Shows navigation values such as: Accuracy, Altitude, Speed, Battery, Bearing, Climb, Course, Date, Declination, Distance, ETA, Latitude, Longitude, Max Speed, Min Speed, Actual Speed, True Speed, Sunrise, Sunset, Moonset, Moonrise, Moon Phase, Target, Time, TTG, Turn. Show the orientation of the earth's magnetic field, shows an arbitrary tracking angle and the current target. Also a marine orienteering compass. Record tracks and view them on map. Export KML files and import into Google Maps, Google Earth and others. Manage routes and view them on map. Import KML files from Google Maps, Google Earth and others. Create turn-by-turn instructions between waypoints. A camera HUD (heads-up display) view to show your waypoints, take pictures and share them. A map to show your waypoints. Convert mail addresses of your contacts to waypoint so that they can be used within the app.

[SharkTracker](#)

The new OCEARCH Shark Tracker lets you observe the migrations of sharks and other marine animals that have been tagged with state of the art satellite tracking technology.

[SkyMap](#)

Sky Map is a hand-held planetarium for your Android device. Use it to identify stars, planets, nebulae and more. Originally developed as Google Sky Map, it has now been donated and open sourced.

[BoatUS](#) (Tides)

The new BoatUS App is all of BoatUS right at your fingertips. Still the fastest way to get a tow, our App combines the features that every boater wants and needs before hitting the water. NOTE: many features beyond towind!
