

Capn Magnetic Variation Update Procedure

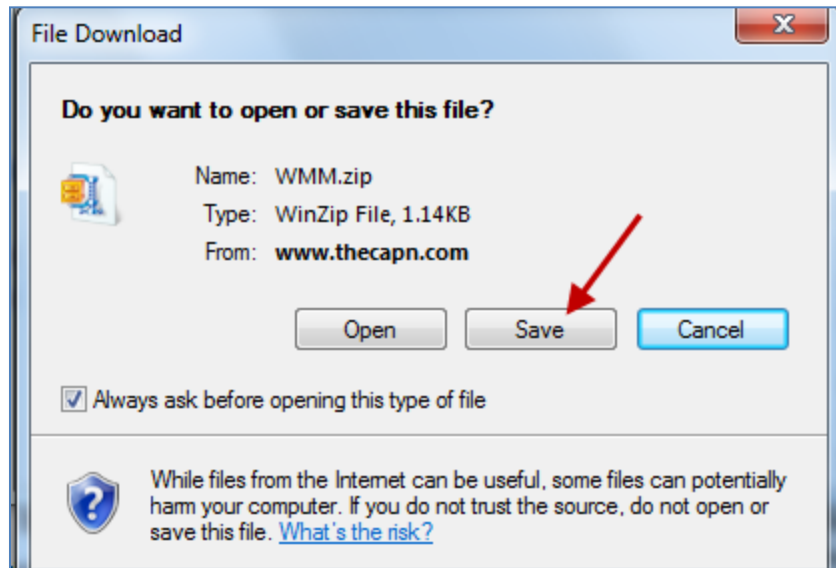

1. Go to www.theCAPN.com
2. Look in the upper right of the web page for the link “Update Your Magnetic Variation File”:

3. Click the link WMM.zip on the web page as shown below :

4. Save the WMM.zip file in the directory that contains Capn Voyager. Normally this is the C:\Capn Voyager directory.

5. Extract the WMM.dat file from the WMM.zip file and save it in the same directory as the WMM.zip file and the Capn Voyager files. The new file should overwrite the old WMM.dat file.
6. Start The Capn program and you should not get the "Magnetic Variation Out-of-Date" message any more.
7. If you still have problems, use The Capn support form at http://www.usps.org/national/eddept/n/capn_form.htm to request assistance from the Offshore Navigation Committee.
