The most common size round logo highway/waterway sign is 30" and it is usually combined with a rectangular 8"x24" information sign. Some municipalities will not allow the 30" sign, and it is usually too large for hotel or restaurant lobbies where USPS meetings are held. For these locations, an 18" logo sign and 6"x18" information sign are more appropriate. Some situations may require more than 1 info sign to be mounted below the logo. All signs are printed on .08" aluminum blanks. The logo has a white reflective background and the info sign has a blue background (same color as the lettering on the logo sign) with reflective white lettering. Mounting post and hardware must be supplied locally. Logo decals can be used to refresh old signs or applied to existing surfaces for other display situations. Info sign text must be specified below.

The 8x24" information sign can have 3 lines of text with a maximum of 25 characters per line.
The 6x18" information sign can have 2 lines of text with a maximum of 17 characters per line.
(Spaces and punctuation marks count as characters. Text should be centered. Use 2nd sheet for multiple info signs.)
Please fill in your requested info sign text in the spaces below. (Smaller sign within outlined area.)
