

Weather Course

Starts: **Monday February 26, 2024 6:00 pm—8:00 pm**

Cost: \$75 For America's Boating Club/Power Squadron member
\$150 for non-members

Where: Port Royal Town Hall

700 Paris Avenue, Port Royal

The safety and comfort of those who venture out-on-the water have always been weather dependent. In this course students will become keener observers of the weather, but weather observations only have meaning in the context of the basic principles of meteorology — the science of the atmosphere.

The course focuses on how weather systems form, behave, move, and interact with one another and reflects the availability of all sorts of weather reports and forecasts on the Internet. The course is a general weather course benefiting those sitting in their living rooms, as much as those standing behind the helm.

Weather covers these topics over 7 two hour sessions:

Topics covered include:

Modern weather forecasting

How weather systems form, behave, move, and interact

The availability of all sorts of weather reports and forecasts on the Internet

...and much more

Online registration: ***Please preregister so we have enough materials!***
